

Appian Accelerate

Advance your digital transformation practice with expert oversight.

The road to digital transformation is rarely smooth. Organizations face barriers including an inability to demonstrate ongoing value, a lack of in-house expertise, and failure to keep up with the latest innovations. Having an experienced team to guide you through the digital transformation lifecycle can make all the difference.

Appian Accelerate is an expert advisory service that propels your team forward and maximizes the value of your applications. From tailored guidance to proactive health checks to a thriving online community, Appian Accelerate helps you drive impactful business outcomes.

With Appian, you get a team of technical and business experts providing guidance on:

- Implementing and technically perfecting digital transformation solutions.
- Building governance rules and frameworks.
- Maximizing outcomes by defining business and project strategy.

How Appian Accelerate Does It

Success Blueprint

Establish a strong foundation for all your projects with our success blueprint, which includes:

- **Foundational session** to establish your enterprise architecture, enable the platform, and understand team composition.
- **Blueprint workshop** to assess team skill sets and target areas for improvement.
- **Success plan** built to align your project with organizational goals and strategies.
- **Monthly Success Reviews** to assess progress, measure value, and update goals.

“I am looking forward to what we will achieve together over the next six months. Appian Accelerate is setting Netwealth up for success now and into the future.”

– Bernard Woolf, Operations
Project Manager at Netwealth
Investments Limited

Platform Health

Ensure strong technical performance with regular platform technical reviews to:

- Optimize application and server performance.
- Scale usage safely with proactive capacity planning.
- Establish strong governance for reliability and safety.

Accelerators

Address specific challenges through targeted mini-engagements. Common use cases include:

- **Optimization** for performance tuning, integration design, and load testing.
- **Innovation** for new feature adoption, prototype instructions, automation technologies, or cross-platform design guidance.
- **Governance** to establish technical standards, establish center-of-excellence best practices, or provide DevOps advice.
- **Design** to help with application development excellence, including design guidance, development reviews, QA reviews, and plug-in reviews.

Ask an Expert

Connect with experts to engage and uplevel your team's skill sets, including:

- **Office hours** to solve your immediate challenges with one-on-one access to experts.
- **An active online community** to learn best practices from fellow Appian practitioners and experts.
- **Community learning sessions** to further enhance your skills with additional training..
