

## Workforce Safety

Maintaining vigilance beyond the pandemic.

### Protecting your workforce.

Most companies are actively developing plans for how to safely bring their employees back to the workplace and remain compliant with the vaccine mandate and OSHA guidelines. To maintain a safe and productive work environment, organizations will need to consider many factors, including individual health and risk screenings for onsite employees, vaccination tracking, contact tracing, shift management, whether an employee's role can be performed remotely, corporate policies, and a variety of evolving national and regional government regulations.

### A unified approach.

Appian Workforce Safety is the only solution with a unified, automated and flexible approach for safely returning to

onsite work and adjusting onsite operations as you track your workforce vaccination status. The unified response hub gives administrators real-time access to track employee health and vaccination insights, monitor incidents and contact tracing across facilities, automate return-to-work authorizations, and comply with company policies and government regulations. The solution can be deployed within hours on the HIPAA-compliant and HITRUST-certified Appian Cloud, or as a self-managed solution.

Workforce Safety is available in English, Italian, Spanish, German, and French, with the ability to expand to other languages for your diverse workforce.

## Reliable, simple, and easy to adopt.

- **Unified Response Hub** - View and manage workforce health and work status in real-time, through a single interface.
- **Vaccination Insights** - Track employee vaccination status and related insights such as intent to get vaccinated, number of doses received, whether someone is partially or fully vaccinated, and exemption status.
- **COVID-19 Test Reporting** - Automate the collection of COVID-19 testing results based on your corporate policies.
- **Employee Screening & Certification** - Provide employees, visitors, contractors, and anyone else onsite with a simple web or mobile interface for submitting and updating their personal health and risk data per federal mandates and OSHA guidelines required by local law and corporate policy.
- **Personalized Questions** - Automatically personalize employee onsite screening and certification questions based on the responder's vaccination status to create a tailored experience for users.
- **Automated Mobile Passes** - Issue or block onsite passes based on various factors, including geography, team, role, personal health risk, workspace capacity, and testing and vaccination status.
- **Dynamic Case Management** - Quickly manage exceptions, appeals, employee concerns, and positive cases with built-in case management capabilities as recommended by the CDC.
- **Contact Tracing** - Easily track and respond to exposures and incidents with contact tracing and case management in keeping with CDC guidelines.
- **Capacity Management** - Streamline scheduling with easily defined capacity limits
- **Onsite Reservations** - Enable employees to plan ahead and reserve their workspaces based on individual preferences and scheduling needs.
- **Reporting & Dashboards** - Gain rich insights by facility to see how many employees are in the office, which locations are controlling spread, and vaccination tracking and incidents by location to help you determine which areas need extra attention
- **Simple Integrations** - Easily connect with mobile badging permissions and other systems you already have in place.
- **Compliant & Certified Cloud** - Safeguard sensitive health information within the Appian HIPAA-compliant and HITRUST-certified cloud.
