appian

Appian for Public Sector: Contract Writing

Streamlining and improving the execution, administration and management processes of mission-critical programs has become a major initiative across the government.

But how can organizations provide innovative acquisition solutions that reduce costs and deliver a more efficient contracting process?
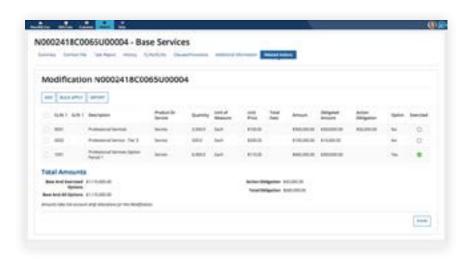

With Appian, public sector agencies can leverage a unified, low-code platform that drives a greater simplification and heightened performance in the contracting process. The Contract Writing application delivers automated notifications of tasks in progress and reports analytics on actions progressing throughout the contracting lifecycle, which leads to increases in efficiency and effectiveness, while reducing costs.

Meet the challenge.

The first step to an effective government procurement process is having the right technology in place.

With Appian, organizations can:

- Implement customized workflows around mission-critical processes and system integrations.

- Streamline and improve the contract execution.

- Standardize reporting for improved efficiency and compliance.

- Leverage an application managed on premises or in the cloud.

Develop interfaces around customized business process workflows.

Integrate with any existing financial and operational applications.

Reduce costs while increasing efficiency and effectiveness.

Maintain FAR and DFARS compliance.

Focus.

Transform your government Contract Writing process for increased efficiency and effectiveness, while reducing costs.

- Combine data from multiple data sources and manage complex data relationships.

- Create and manage business rules to quickly adapt to evolving policies.

- Integrate with existing financial and operational systems.

- Maintain FAR and DFARS compliance.

Take control.

Automate the entire public sector procurement and acquisition cycle with solutions for: Acquisition planning.

- Contract writing.

- Purchase requests.

- Contracts management.

- Invoice tracking.

Prepare for the future.

It takes speed and power to deliver transformational public sector solutions. The Appian Low-Code Platform provides both.

Transform critical, public sector services with an application platform that delivers high-speed, cost-effective IT modernization that fits your specific organizational demands.

With Appian, your agency can harness the power of a unified, low-code platform on premises or in the cloud to manage complex processes, end-to-end, without limitations.

Leading organizations trust Appian.
