

Appian CampusPass™

The fastest way to coordinate the return to campus and to ensure the ongoing safety of your entire academic community.

Reimagining campus life.

The COVID-19 pandemic continues to disrupt campus life, challenging colleges and universities across the globe to coordinate the safe return of their students and faculty and to ensure their ongoing safety through effective screening and monitoring.

Coordinate and communicate across all departments and students.

Appian CampusPass™, developed with the University of South Florida, is the fastest way to coordinate the safe return of your entire academic community and maintain ongoing health and safety. You can be up and running on the application within hours.

CampusPass™ facilitates institution-wide coordination and communication by giving all departments access to the same information in real time.

Through a unified command center and single interface, you can see and manage the health and vaccination status of multiple campuses, while adhering to your policies and local regulations.

And as dynamics shift and protocols may need to change, CampusPass™ scales to your evolving needs. With highly-rated reliability and comprehensive security qualifications, you can trust that all collected information is secure within the Appian HITRUST-certified and HIPAA-compliant cloud. CampusPass™ also enables GDPR compliance for data privacy. The solution is available on the Appian Cloud or on-premises.

The health and safety of students, faculty, and staff is our most important concern during this pandemic. Coordinating and communicating across all departments and tens of thousands of students poses a significant challenge for universities, and Appian is the platform that brings us all together safely and securely.

Sidney Fernandes
CIO, University of South Florida

Smart automation that is easily configured for your evolving needs.

- **A unified response hub.** See and manage the health and campus status of the entire academic community in real time through a single interface.
- **Vaccination insights.** Track vaccination status and related insights, such as number of doses received and exemption status.
- **COVID-19 test reporting.** Automate the collection of COVID-19 testing results based on your institution's policies.
- **Fast, easy screening.** Through a simple web or mobile interface, students, faculty, staff, vendors, and visitors can securely submit and update the personal health and risk data required by local regulations and your policies.
- **Automated Mobile Pass authorization.** Based on your policies, students, faculty, staff, and others approved to return to campus receive an automated authorization "pass" (with QR code) displayed on their mobile device for easy verification.

- **Intelligent return to campus verification.** Define internal policy rules regarding return to campus authorization. Appian helps with pre-built rules based on health organization guidelines and government regulations. Your rules are applied to everyone's health and risk submission data to automatically authorize on-campus access, which is controlled through Mobile Pass.
- **Robust privacy and security.** To protect personal health information, the solution runs on the HIPAA-compliant and HITRUST-certified Appian Cloud. It also enables GDPR compliance for data privacy.
- **Contact tracing and isolation processing.** Rapidly identify and respond to COVID-19 exposure incidents across campus, and manage the process to quickly isolate exposed, on-campus residential students with investigatory case management.
- **Global languages.** The application interface is available in English, Italian, Spanish, German, and French, with the ability to expand to other languages.
- **Deploy quickly.** Get up and running in hours. Deploy in days.
- **Institutional branding.** Easily add your school's logo and colors to the interface.

New features are released regularly on the Appian Low-Code Platform.

Appian is the unified platform for change. We accelerate customers' businesses by discovering, designing, and automating their most important processes. The Appian Low-Code Platform combines the key capabilities needed to get work done faster, Process Mining + Workflow + Automation, in a unified low-code platform. Appian is open, enterprise-grade, and trusted by industry leaders. For more information, visit [appian.com](https://www.appian.com).
