

Appian Boost

What is Appian Boost?

Appian Boost services ensure that customers who choose our partners for implementations will get the best outcome from their Appian investment. Boost offers support from Appian Customer Success experts throughout the project life cycle and is packaged in a way that aligns with the size and scope of the partner project.

What are the benefits of Appian Boost?

Appian Boost was designed to minimize project risk, enable faster delivery of projects, and increase knowledge transfer from Appian Customer Success to our partner and customer community. In the last 20+ years, Appian has delivered over 5,000 successful projects, and Appian Boost brings this experience to our partners.

What is included in Appian Boost?

Expert Guidance – Provides project teams with timely expert guidance throughout the project life cycle, from solution design to build and ultimately to release. Appian experts regularly engage and advise your delivery team on Appian best practices and help overcome technical challenges.

Embedded Experts – Experienced Appian Developers supplement your project team.

How do I get started with Appian Boost?

Contact success@appian.com or your account representative to learn more about Appian Boost and how to leverage our partner ecosystem jointly with the Appian Customer Success team.

Boost your project.

Appian joins your partner-led deployment team. Appian experts will boost your team's success throughout your project life cycle.

Appian helps organizations build apps and workflows rapidly, with a low-code automation platform. Combining people, technologies, and data in a single workflow, Appian can help companies maximize their resources and improve business results. Many of the world's largest organizations use Appian applications to improve customer experience, achieve operational excellence, and simplify global risk management and compliance.
