

## Appian Portals

Secure, public websites built with low-code.

Accelerate processes and provide seamless customer experiences with Appian Portals. Secure, self-service web apps allow users to engage with your business without signing in, speeding up processes that start with customer actions, like requesting a quote or scheduling an appointment, and eliminating manual information queries, like requests to view public records.

Because every portal is part of the secure Appian Platform, you can build reliable public websites with familiar low-code tools, customize and optimize for any device, and create a portal for nearly any use case that is compliant with SOC2 and other security standards.

- **Bring self-service to your customers.** Kick off workflows and automations with customer actions—making processes faster and the customer experience seamless.
- **Go from idea to app in days, not months.** Skip the design headaches and quickly build with low-code to create rich, intuitive public websites.
- **Build secure public websites.** Appian's secure SAIL architecture provides compliance with SOC2 and other security standards.
- **Manage and publish with ease.** Easily update, manage, and deploy on a modern cloud architecture without advanced technical expertise.

### The front door to your applications.

Appian Portals unifies customers, partners, and employees with secure, self-service web apps that seamlessly connect to your processes and applications.

## Appian Portals has powerful capabilities to connect your people and processes.

- **Secure, public websites.** Deploy public apps that allow users to start processes and view data without needing to sign in.
- **Appian SAIL.** Quickly create intuitive and engaging user experiences with low-code design architecture.
- **Progressive web apps.** Deploy your web portal as a modern progressive web app (PWA) for a stand-out mobile experience.

## Build a public website for any industry or use case.

**Public sector.** Apply for grants, check tax refund status, apply for or renew passports, report incidents, and review public records.

**Financial services.** Onboard customers, process issues like SEC whistleblower reports, capture survey feedback, and receive mortgage forbearance requests.

**Healthcare.** Onboard new patients, verify contact information, report incidents, request appointments, find doctors, and sign up for vaccine registration.

**Insurance.** Request a quote, report a claim, and confirm contact information.

**Utility.** Self-register, report service outages, and check outage statuses.

**Education.** Schedule a university visit, find a degree program, check credit transfers, and confirm contact information.

## Deliver better self-service experiences faster.

LiUNA saved 2 months of manual work and 9 months of developer time with Appian Portals.

We ultimately chose Appian as our modern platform because of its flexibility, allowing us to build all membership-based applications and process all of the data about our members in one place.

**LiUNA!**

*Feel the Power*

**appian**

Appian is a software company that automates business processes. The Appian AI-Powered Process Platform includes everything you need to design, automate, and optimize even the most complex processes, from start to finish. The world's most innovative organizations trust Appian to improve their workflows, unify data, and optimize operations—resulting in better growth and superior customer experiences.
