

## Appian Protect

Security monitoring, end-to-end encryption, and more to meet the most strict compliance requirements across financial services, government, and healthcare.

Organizations that work in highly regulated industries must meet strict data protection and security requirements. For decades, Appian has earned the trust of the leading government organizations, financial institutions, and healthcare organizations by maintaining strong data security, continuous monitoring, and end-to-end encryption to prevent breaches.

Appian Protect is a tiered security offering that allows you to protect your data and systems in the cloud and across mobile applications. Every Appian Protect customer receives:

- Data loss prevention (DLP) that alerts on or blocks abnormal user behavior.
- Monitoring with security orchestration, automation, and response (SOAR).
- Real-time intrusion detection and monitoring.
- Comprehensive antivirus scans.
- Enterprise-ready authentication and authorization with single sign-on (SSO).
- Integration authentication.
- Inbound web API authentication.
- Row-level data fabric security with user access preview.

For more advanced security features and flexibility, choose one of our premium support tiers. Premium support tiers offer the ability to use self-managed resources, additional traffic protection, increased disk and database encryption, log streaming for security and performance monitoring, white glove security consultations like audits and annual questionnaires, and more.

Find out what's included with each tier in the table on the next page.

- Safeguard sensitive and regulated data in Appian Cloud and mobile applications.
- Keep applications, data, and operations compliant with state, local, federal, and global regulations.
- Maintain strong security at scale without compromising the speed of your applications and processes.

### Appian's secure architecture complies with:

- SOC 2 Type II
- SOC 3
- PCI DSS
- HIPAA
- FDA 21 CFR Part 11
- Impact Level-5 in US Federal
- FedRAMP
- StateRAMP
- HITRUST
- Canada Protected B
- UK Cyber Essentials Plus
- Spain's National Security Framework (ENS)

## Choose your Appian Protect tier.

Appian Protect lets you choose the level of protection and flexibility you need. Every Appian customer receives Basic support at a minimum.

Appian Protect				
Feature	Basic	Essential	Advanced	Enterprise
World-class platform security monitoring and response by the Appian security team using Appian's proprietary security orchestration, automation, and response (SOAR) solution	✓	✓	✓	✓
Data loss prevention (DLP)	✓	✓	✓	✓
Real-time intrusion detection monitoring and response for the Appian Platform	✓	✓	✓	✓
Comprehensive antivirus scanning	✓	✓	✓	✓
Enterprise-ready authentication and authorization with SSO (built in or connected to your LDAP, SAML, OpenID Connect, Login.gov, or P1EE)†	✓	✓	✓	✓
Integration authentication (OAuth 2.0, Google Service Account authentication, AWS Signature Version 4 authentication)†	✓	✓	✓	✓
Inbound Web API authentication (API keys, OAuth 2.0)†	✓	✓	✓	✓
Encrypt sensitive data fields in user interfaces†	✓	✓	✓	✓
Row-level data fabric security with user access preview†	✓	✓	✓	✓
VPN (inbound and outbound, dynamic and fault-tolerant)		✓	✓	✓
AWS PrivateLink (inbound and outbound)		✓	✓	✓
Trusted IPs		✓	✓	✓
Custom TLS policies		✓	✓	✓
Bring your own key (AWS HSM or AWS KMS)			✓	✓
Appian Cloud database encryption with AWS KMS			✓	✓
Log streaming			✓	✓
Enhanced business continuity			✓	✓
Dedicated VPC				✓
Annual customer audit				✓
Site data audit requests				✓
Annual security questionnaire				✓

†Available to both Appian Cloud and self-managed customers.

We protect your data and what matters most for your business, so you can move quickly to automate workflows and deploy applications with integrity, reliability, and at scale. Appian's enterprise grade security and compliance ensures you can focus on your customer's experience and what makes your business unique.

Andrew Cunje,  
Chief Information Security  
Officer, Appian.
