

## Appian Accelerate for Appian Government Cloud

### What is Appian Government Cloud?

Appian Government Cloud IL5 PaaS/SaaS (eMASS System ID #73), or more commonly called "AGC," is a cloud service offering for the Department of Defense (DoD) with a Defense Information Systems Agency (DISA)-issued Provisional Authorization to Operate (PA). DoD mission owners can leverage the AGC PA to reduce their security responsibilities and accelerate their Authority to Operate (ATO) for cloud applications. Applications deployed on AGC are built using the Appian Platform for process automation.

### What is Appian Accelerate?

Appian Accelerate is a service that ensures you get the most out of your Appian investment by providing tailored guidance at every step of your Appian journey. Our team of experts will:

- Onboard and guide you through the AGC environment provisioning process.
- Provide expert guidance for Secure Cloud Computing Architecture (SCCA), Cloud Access Point (CAP)/Boundary Cloud Access Point (BCAP), and Identity Provider (IdP)/Identity, Credential and Access Management (ICAM) selection.
- Deliver guidance throughout the Risk Management Framework (RMF) and ATO process.
- See you through application go-live and provide ongoing support.

### Benefits of Appian Accelerate for AGC customers.

- Expedited environment access through guided onboarding.
- Reduced risk through support for ATO, continuous monitoring, and application go-live readiness.
- Expedited ATO with baseline documentation and control implementation guidance.
- Reduced risk through support for ATO authorization, continuous monitoring, and application go-live readiness.

### How Appian Accelerate drives success.

#### Guided onboarding.

The Appian Accelerate team provides a guided onboarding experience for the environment provisioning process, working closely with customer contacts, partner resources, and the AGC support team. Onboarding includes a formal kickoff meeting, recurring check-in meetings for progress review and discussions, and as-needed meetings with Appian experts.

#### Expert advisement.

Appian Accelerate architects guide the selection of SCCA, CAP/BCAP, IdP/ICAM services and advise during the entire risk management framework (RMF) process, including providing baseline artifacts.. They also provide configuration recommendations and escalation support throughout application development.

#### Sustainment support.

The Appian Accelerate team ensures continuous operation and maintenance for your Appian applications, including expert platform, workflow, and reachback support, guidance and coaching, and top-notch security.
