Appian Empowerment

We transfer ownership and expertise to you.

Long-lasting digital transformations rely on strong development teams to provide ongoing value. This means hiring the right people, developing the right skill sets, and adopting effective development methodologies and practices. The Appian Platform makes a new way of working possible. We'll help you establish a robust in-house practice that enables you to continuously innovate, build applications with incomparable speed, and produce ongoing value for your business.

Appian Empowerment brings our experience from more than two decades and 5000+ successful implementations to help you build an effective, in-house Appian development process. We collaborate with your team on a practical, real-world application that supports your organizational goals while teaching you the most effective agile methods to produce consistent, quick results. And we conduct an orderly transfer of ownership from our team to yours to ensure your ongoing success.

- Learn Appian by jointly building a real-world business capability with our experts.
- Gain consistent oversight and support from Appian experts.
- Access curated training for all practitioners for a full year.

3 Phases of Empowerment

How does Appian Empowerment work? Through three key phases:

Readines

The Readiness phase ensures that all the essential pieces are in place. In this phase, we will:

- Conduct an assessment of your existing development program and team skills to tailor our approach.
- Deliver workshops to enhance your knowledge of low-code development best practices.
- Complete technical pre-work on the business case to handle bespoke infrastructure or complex dependencies.

Appian Empowerment provides you with:

☑ **Autonomy** in your Appian practice.

☑ **Increased productivity** to realize value faster.

☑ **Cost containment** and accurate cost projections.

Showcase

During the Showcase phase, you'll see the speed and performance of Appian first-hand. Shadow our team as we:

- Complete a discovery sprint to define the business case and create a backlog and product roadmap.

- Execute implementation sprints focused on setting ambitious performance benchmarks.

Performance

During the Performance phase, your team will take the lead and build an ongoing, effective practice. They will:

- Take over delivery, with close and continuous support from the Appian team.

- Gain lasting benefit from bi-weekly deep dives into essential Appian topics.

- See measurable progress through updated program and practitioner assessments completed at the end of each sprint.

- Continue building skills with year-long access to unlimited instructor-led, tailored Appian training.
